EDUCATION

University of Texas at Dallas — M.S., Management Sciences, Dallas, TX Aug 2024 – May 2026

Special Honors, Scholar with Recognition — Naveen Jindal School of Management

University of California, Irvine — B.S., Biological Sciences, Irvine, CA Sep 2017 – Jun 2021

WORK EXPERIENCE

Data Analyst, Lelon Electronics Corp, Jiangsu, China Jun 2021 – Jul 2024

- **Reduced defect rate 88%** by leading a DMAIC project applying DOE regression across 29 process inputs to isolate 4 critical failure drivers
- **Cut costs \$7,000/month** by engineering a real-time SQL dashboard tracking process metrics like pH, concentration, and volume, adopted across operations
- **Secured 100,000+ unit Bosch purchase order** by resolving 391 compliance gaps across 12 qualification modules through cross-functional root cause analysis and stakeholder communication with engineering, quality, and operations
- **A/B tested 10+ capacitor configurations**, applying statistical modeling on capacitance, ESR, and leakage current, to drive 4% EV market share capture
- **Prevented \$500,000 in contract risk** for Huawei, Apple, and Bosch by diagnosing electrolyte absorption and insertion defects through SPC and predictive modeling, delivering findings via executive presentation to cross-functional stakeholders

Intern, Lelon Electronics Corp, Jiangsu, China Jun 2019 – Sep 2019

- **Boosted capacitor output 166%** by identifying manual handoff bottlenecks through data-driven workflow analysis - redesigning production line processes to eliminate automation gaps and improve ETL of production data

PROJECTS

Texas Instruments, AI/Robotics Market Investment Strategy, Dallas, TX Jan 2026 – May 2026

- **Built robotics market entry framework** - weighted scoring matrix across 11 segments, 9 criteria, and 30+ sources surfacing 5 priority targets within a \$250B global market
- **Led 4-person team producing BCG-style strategy deck** benchmarking 15+ competitors including Nvidia - presented to TI's marketing director and executive panel
- **Identified certification gaps across priority sectors and mapped a sector-specific investment roadmap** guiding TI's near-term product decisions

FleetPride, Price Elasticity Modeling & Demand Forecasting Platform, Dallas, TX Jan 2026 – May 2026

- **Forecasted price elasticity and demand seasonality across 5,000+ SKUs** - building XGBoost and Bayesian mixed effects models with 20+ macroeconomic and seasonal features through end-to-end ETL pipeline, achieving $R^2=0.88$
- **Engineered 6-tab dashboard tool** connecting XGBoost price elasticity outputs to real-time deal recommendations, cutting sales analyst pricing decisions from days to minutes
- **Led 8-person team delivering full pricing analytics platform in 5 months** - coordinating data pipeline, modeling, and dashboard deployment across agile sprint framework
- **Built an AI natural language interface via Gemini API**, prompt engineering the model to answer pricing questions in English using the XGBoost and Bayesian model outputs

Skills & Additional Information

Technical: Python, SQL, R, Snowflake, AWS, Tableau, Power BI, Excel (VLOOKUP, Pivot Tables, Nested Formulas), Git, Spark, Analytics & Modeling: Demand Forecasting, A/B Testing, XGBoost, Bayesian Modeling, Regression Analysis, Price Elasticity, Statistical Modeling, Feature Engineering, Predictive Modeling, Customer Behavior Analysis

Data Engineering: ETL, Data Pipeline, Data Warehousing, Data Quality & Validation

Business: KPI Development, Root Cause Analysis, Lean Six Sigma, Stakeholder Communication, Executive Presentation

Languages: English (fluent), Mandarin (native)

Work Authorization: Authorized to work in the U.S.
