EDUCATION

University of Texas at Dallas — M.S., Management Sciences, Dallas, TX Aug 2024 – May 2026

Special Honors, Scholar with Recognition — Naveen Jindal School of Management

University of California, Irvine — B.S., Biological Sciences, Irvine, CA Sep 2017 – Jun 2021

WORK EXPERIENCE

Operations Analytics Specialist, Lelon Electronics Corp, Jiangsu, China Jan 2022 – Jul 2024

- Reduced defect rate 88% by leading a DMAIC project — applying Pareto analysis, hypothesis testing, and DOE regression modeling across 29 process inputs to isolate 4 root causes
- Cut wastewater costs \$7,000/month by identifying pH, concentration, and volume anomalies via SQL KPI dashboards, driving a closed-loop treatment system
- Secured 100,000+ unit Bosch purchase order by resolving 391 compliance gaps across 12 ASA qualification modules through cross-departmental root cause analysis

R&D / Quality Assurance Scientist, Lelon Electronics Corp, Jiangsu, China Jun 2021 – Jan 2022

- Optimized hybrid capacitor design across 10+ configurations using A/B testing on capacitance, ESR, and leakage current, driving 4% EV market share capture
- Diagnosed electrolyte absorption failures and pin insertion defects using SPC and root cause analysis, preventing \$500,000 in contract risk for Huawei, Apple, and Bosch

Manufacturing Intern, Lelon Electronics Corp, Jiangsu, China Jun 2019 – Sep 2019

- Boosted capacitor output 166% by identifying manual handoff bottlenecks and redesigning production line workflows to eliminate automation gaps

PROJECTS

AI / Robotics Market Entry Strategy, Texas Instruments, Dallas, TX Jan 2026 – Present

- Sized E&E robotics market using TAM, CAGR, and 8-competitor threat analysis across 30+ sources, delivering segment entry recommendations to TI's marketing director
- Coordinated a 4-person consulting team across 11 robotics segments, synthesizing findings into a market entry strategy presented to TI's marketing and executive teams

Price Elasticity Modeling & Demand Forecasting Platform, FleetPride, Dallas, TX Jan 2026 – Present

- Uncovered price sensitivity and seasonality effects by building XGBoost and Bayesian mixed effects elasticity models across 5,000+ SKUs — achieving $R^2=0.88$ across 20+ macroeconomic features
- Built a 6-tab Streamlit pricing simulator translating XGBoost outputs into instant data-driven negotiation recommendations for FleetPride sales analysts
- Delivered a full pricing analytics solution in 5 months by leading an 8-person team across data pipeline, XGBoost and hierarchical mixed effects modeling, and Streamlit deployment

Skills & Additional Information

Technical: Python (Pandas, NumPy), SQL, Predictive Modeling, Statistical Modeling, Data Visualization, Feature Engineering, A/B Testing, Hypothesis Testing, XGBoost, Bayesian Mixed Effects, Tableau, Power BI, Plotly, Snowflake, AWS, Spark, Git, Excel

Languages: English (fluent), Mandarin (native)

Work Authorization: Authorized to work in the U.S. (STEM OPT eligible); TN visa eligibility as a Canadian citizen
